About the IAQF

The International Association for Quantitative Finance (*formerly the IAFE*) is the professional society dedicated to fostering the profession of quantitative finance by providing platforms for the discussion of cutting-edge and pivotal issues in the field. Founded in 1992, the IAQF is composed of individual academics and practitioners from banks, broker dealers, hedge funds, pension funds, asset management firms, technology firms, regulatory bodies, accounting, consulting and law firms, and universities across the globe.

Through frank discussions of current policy issues, hosting programs to educate the finance community, and recognizing the outstanding achievements in the field, the IAQF acts as a beacon for the development of quantitative finance. Throughout its history, the IAQF's pre-eminent leadership has positioned us to respond with savvy to the evolving needs of the financial engineering community. The IAQF's programs – from our area-specific committees to our evening forums to the Financial Engineer of the Year Award – are designed to provide our membership with uniquely valuable activities to enhance their work in the field.

Why sponsor the IAQF?

As ever more attention is focused on quantitative finance, the IAQF stands out as the leading professional society with a mission to address the timely and innovative issues in the field. The IAQF hosts a well-crafted series of forums each spring and fall to highlight a variety of relevant policy issues and cutting-edge finance topics. Instead of PowerPoint presentations, informal and lively discussions among the leading voices in the field are the centerpiece of our programs. The cocktail receptions following these events are excellent opportunities to network. In a growing pool of similar offerings, the quality and design of IAQF programs set them apart.

Our membership represents an unmatched level of expertise. For sponsors, this translates into an effective use of restricted marketing dollars. The IAQF Board of Directors and Senior Fellows are composed of the foremost pioneers in quantitative finance – their leadership ensures that the focus of our events is ahead of the curve.
